- Fun Box - SB-009
- Handbox Rail - SB-031
- Roller Ramp - SB-029
- Grindrail Box - SB-032
- Spine Ramp - SB-005

Please note –

The main illustrations shown are indicative only. For the exact ramp sizes, please refer to the individual product sheets for each item included.

Skate-04

Skate

The Caloo skate range is manufactured from heavy duty galvanised steel which is internally clad with plywood to help absorb wheel noise. The riding surface is coated with a specialist protective paint to help deaden sound and is a tough, hard, durable coating used in the automotive industry to protect against stone chips, salt, damp and rust. This provides a great skate surface, is super tough and vandal resistant.

All Caloo Skate products are designed and manufactured to BS EN 14974:2006+A1:2010
