

MonsterPlay@Caloo artificial play grass is an ideal solution for safe, soft grass that needs no maintenance. Ideal for sports and play, and perfect for playgrounds.

Extremely durable, non-abrasive and highly UV resistant, our synthetic turf is an efficient alternative to real grass, with no additional maintenance costs and excellent resilience to wear and damage.

With practically invisible seaming producing one continuous and smooth-looking surface, it is well suited for larger areas and can be installed over a cushioned pad or direct onto properly prepared sand or pulverised granite.

## ▶ KEY FEATURES

- Porous/fast draining
- Extremely durable
- Non-abrasive
- Excellent resilience to damage and wear
- Very low maintenance
- Year-round use
- Complies with BS EN 1177:2008
- Play grade material
- Weatherproof
- Mimics look and feel of natural grass
- Virtually invisible seaming, creating a smooth surface
- 28mm pile for maximum comfort

## ▶ TOTAL SERVICE

MonsterPlay@Caloo offers a bespoke design to delivery service, beginning with your initial consultation and site survey, ranging to a turnkey design service and professional installation. Simply let us know your ideas and we'll transform them, and your outdoor surfacing, into a reality.

## ▶ Realistic appearance

MonsterPlay@Caloo artificial play grass blends natural green, olive and sand toned twine into woven backing polymers for enhanced durability and resilience. The result? A realistic blend of natural tones that mimics the look of natural grass, creating a lasting impression for your facility that is perfect for year round use. We even use a mix of straight and textured pile to create a hyper-realistic texture.

## ▶ Critical Fall height chart

The MonsterPlay@Caloo artificial play grass surfacing has been tested to the strict requirements of EN 1177:2008 on a concrete base in laboratory conditions (worst case scenario). The purpose of the Standard is to reduce the risk of injury to children's heads, legs, arms, shoulder and backs.

MonsterPlay@Caloo artificial play grass requires minimal groundwork preparation and can be installed directly onto soil or existing hard surfaces such as tarmac. The surface is fully porous and low maintenance.

## ▶ SUB BASE PREPARATION

The appearance can mimic a well manicured lawn or more luxuriant long grass.

The artificial grass surface is weatherproof and porous.

For larger or more complex areas, durable and practically invisible seaming produces one continuous and smooth-looking surface.

Our artificial grass can be installed over a cushioned pad or direct onto properly prepared sand or pulverised granite.

MonsterPlay@Caloo play grass is very versatile and used in a variety of conditions. For further information on site specific installations, please contact us to discuss your individual requirements.
