

Brick Path

SS8-09

A brick path is ideal if you're looking to create a meandering sensory path through your grounds or park. Making for an attractive link from A to B. The advantage of using bricks is their durability and rich colour.

Code	Area - approx
SS8-09A	20sq m
SS8-09B	50sq m
SS8-09C	100sq m

Surfacing - Pathways

We offer a comprehensive range of impact absorbent and traditional playground surfaces. Our impact absorbent surfaces are certified to EN1177 and include rubber wet pour, grassmatting, bonded rubber shred and loose fill systems. We can undertake site preparation as required for these surfaces and our installation teams are experience in the installation of traditional tarmac areas and can lay new or overlay existing.
