

Open Arbour (Timber Roof)

CAN-302

Unit Sizes: 2.4m x 2.4m

Furniture - Arbours

Canopies provide outdoor UV protection and a covered space in wet weather for schools, nurseries, playgrounds and day centres offering pupils and young children a safe environment, in the shade, to learn and play.

MonsterPlay@Caloo provide a comprehensive and flexible service to schools and nurseries. We design manufacture and install a wide range of all weather outdoor structures and provide various options for shading and all weather play including complete outdoor classrooms, all-weather canopies, sunblock sail shades and stage & performance areas.

Our designs promote a stimulating outdoor play and learning environment which work well in any play environment.

Our outdoor classes and shelters are made from high quality pressure treated timber or recycled steel and timber combined and are available in a wide range of sizes and options to suit your space. We also offer a number of extras including window boxes and roof windows for extra light.
