The Vision

Harrow Council wanted a large triple MUGA at West Harrow Recreation Ground, giving local residents, schools and sports groups a genuine multi-sport space rather than a single-use court. The brief called for one big multi-use games area split into three separate courts, finished in green coated tarmac with line markings, so several different sports and user groups could make use of the site at once.

The Solution

Caloo installed a large triple Multi-Use Games Area at West Harrow Recreation Ground, divided into three separate courts: one for football and basketball, one for tennis, football and basketball, and one for tennis and netball. Championship-spec fencing with enclosed, lockable goal ends encloses the whole facility, finished in green coated tarmac with line markings for every sport.

The Impact

Overall, the new triple MUGA has been a great success with the local community, giving residents, schools and sports groups a genuine range of sports to choose from on their own doorstep. The bold, coloured surfacing gives the site an exciting new look, and the variety across the three courts means far more user groups can take advantage of the facility than a single court would allow.

Key Considerations

The installation took place inside a community park with public access 24/7, so Caloo installed protective fencing around the work area to keep the team safe and limit public access while the courts were being built.

Why Caloo?

- Three genuinely different court configurations, not one repeated layout
- Site safety managed throughout a live, 24/7 public park
- Championship-spec fencing, lockable goal ends and durable coloured surfacing built in as standard

Installed Equipment:

Championship-Spec Weld Mesh Fencing, 3m/4m High

Recessed Goal Ends

Macadam Surfacing with Line Markings

Surfacing:

40mm macadam
overlay with non-slip
acrylic green paint

Completed:

30/03/2018

Items Installed:

3
