3m Sandpit Shelter

EYA-010

A spacious timber sandpit with overhead shelter, designed to provide shade and cover for extended outdoor play.

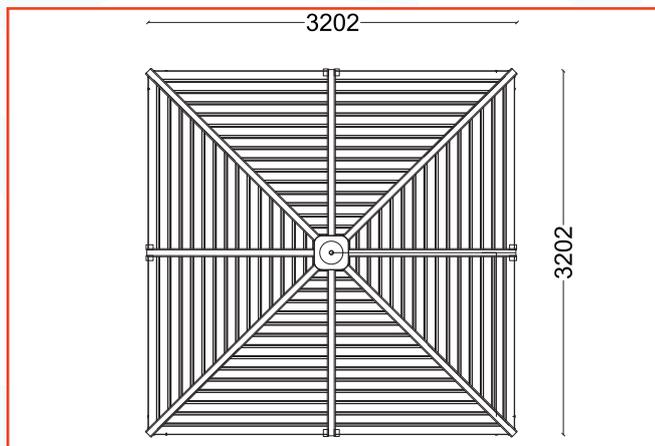

Constructed from timber with a showerproof shiplap roof, this unit features robust sleeper sides and includes a bespoke engraved HDPE sign. No base is included.

The unit measures 3202mm in length and width, with a height of 3216mm and a sandbox depth of 409mm for large group use.

Sand not included
(Sand required = 2.87m³)

Technical Information

Materials

Pressure-treated UK pine sleepers are a highly durable and versatile material designed for exterior use, especially in demanding, ground-contact applications.

They are engineered through a specific industrial process to provide long-term resistance to biological degradation that would quickly destroy untreated timber.

Manufactured from high-grade waste which rescues countless tons of scrap from ending up in landfill. Renowned for its exceptional durability, our HDPE is virtually unbreakable, engineered to withstand the most challenging conditions. Moreover, it boasts excellent UV stability.

Surfacing

Surface Measurements

Grass Matting N/A

Grass Matting (Wear Area) N/A

Wetpour N/A

No safety surface required as critical fall height is less than 600mm. However, we suggest allowing an appropriate free space around the item in compliance with BS EN1176.
