Sand Crane

EYA-015

A compact, engaging play unit that supports coordination, motor skills, and imaginative sand play.

Constructed from timber and colourful HDPE, the Sand Crane includes a stainless steel pulley and chain with a rubber sand bucket for lifting and moving sand. Bespoke HDPE colour options are available on request.

The unit measures 304mm (L) × 230mm (W) × 1500mm (H) and works well in sand play zones or as a standalone feature.

Sand not included

Technical Information

Materials

Our timber play equipment is constructed from laminated Glulam timbers for all load-bearing and structural posts. Made from European Redwood heartwood, the laminates are bonded with moisture-resistant, durable, and structurally approved adhesive, with grains aligned for maximum strength. Sourced from FSC-approved, sustainably managed European forests, Glulam ensures both safety and environmental responsibility.

Manufactured from high-grade waste which rescues countless tons of scrap from ending up in landfill. Renowned for its exceptional durability, our HDPE is virtually unbreakable, engineered to withstand the most challenging conditions. Moreover, it boasts excellent UV stability.

Surfacing

Surface Measurements

Grass Matting	N/A
Grass Matting (Wear Area)	N/A
Wetpour	N/A

No safety surface required as critical fall height is less than 600mm. However, we suggest allowing an appropriate free space around the item in compliance with BS EN1176.
