# 1m Underground Sleeper Tunnel

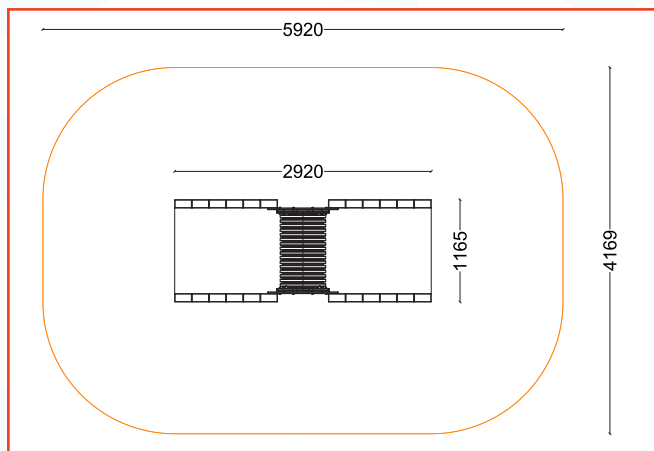

## Timber - 1m Underground Sleeper Tunnel

An exciting ground-level play feature designed to encourage crawling, exploring, and imaginative play.

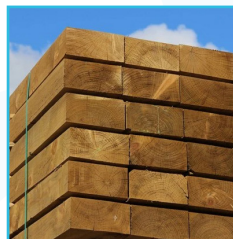

The Underground Tunnel includes a durable tunnel tube with supporting timber legs, ideal for embedding into a grass or safety surface mound. It offers a fun and engaging way for children to develop gross motor skills while adding variety to any natural play space.

### Technical Information

### Materials

Pressure-treated UK pine sleepers are a highly durable and versatile material designed for exterior use, especially in demanding, ground-contact applications.

They are engineered through a specific industrial process to provide long-term resistance to biological degradation that would quickly destroy untreated timber.

Manufactured from high-grade waste which rescues countless tons of scrap from ending up in landfill. Renowned for its exceptional durability, our HDPE is virtually unbreakable, engineered to withstand the most challenging conditions. Moreover, it boasts excellent UV stability.

### Surfacing

### Surface Measurements

Grass Matting	24m <sup>2</sup>
Grass Matting (Wear Area)	4m <sup>2</sup>
Wetpour	22.7m <sup>2</sup>

No safety surface required as critical fall height is less than 600mm. However, we suggest allowing an appropriate free space around the item in compliance with BS EN1176.
