Hurdles

CW-66

The Hurdles x3 provide a fun, versatile way to improve agility, coordination, balance and lower-body strength through dynamic jumping, stepping and hopping exercises.

Designed with three stations, multiple users can train together, making it ideal for group fitness and circuit workouts. The bars also support push-ups, dips and stretching exercises, adding upper-body training to every session.

Manufactured in accordance with EN16630, this durable outdoor fitness station is perfect for parks, schools and community spaces.

Technical Information

Materials

The main structure is manufactured from welded steel tube, forming the upright posts, moving arms, foot supports and frame. Steel provides the strength, rigidity and load-bearing performance required for outdoor fitness equipment.

The welded construction gives stability, impact resistance and long-term durability for regular public use in exposed external environments.

The steel is prepared before coating through cleaning, degreasing and rust removal. A powder-coated finish is then applied to create a smooth, hard-wearing protective layer.

This coating helps resist weathering, corrosion, surface scratches and general wear while giving the unit its green and grey appearance for outdoor use.

Surfacing

Grass Matting

Surface Measurements

30m²

Grass Matting (Wear Area)

8m²

Wetpour

24.9m²

No safety surface required as critical fall height is less than 1000mm.

However, we suggest allowing an appropriate free space around the item in compliance with BS EN16630.
