 Caloo

## The Vision

Now serving Key Stage 2 as well as its youngest pupils, the school needed a playground with real challenge for older children, not just early years, plus a dedicated performance area for assemblies and play.

## Why Caloo?

- Designed to work for the whole school, with real KS2 challenge as well as EYFS and KS1
- A dedicated performance area added beyond the standard brief
- Durable, low-maintenance surfacing with a 7-year warranty
- A flexible design process, from open brief to a choice of options

## The Solution

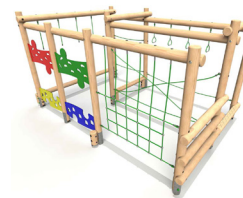

A timber play frame and trail (roll-over bars, monkey bar log, wobble bridge and climb net), a Corner Stage with Roof, whisper bench and toddler shelter, all set on new artificial grass.

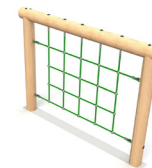

## The Impact

The playground now works for the whole school, not just its youngest pupils, with real challenge for older children and a dedicated stage for performance and play. The new artificial grass surfacing is safer, lower-maintenance and built to last.

## Installed Equipment:

Timber Play Frame

Climb Net

Timber Large Toddler Shelter with 3 Sides

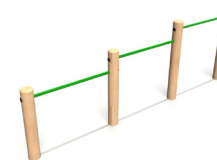

Wobble Bridge

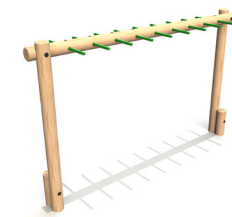

Artificial Grass

Corner Stage with Roof

Roll Over Bars

Monkey Bar Log

Whisper Bench (1.4m long)
